

**MONTANA FISH, WILDLIFE & PARKS**  
**PUBLIC COMMENTS ON PROPOSED 2020 BRUCELLOSIS WORK**  
**PLAN**

1. Tom Radant Libby MT

This plan should be implemented as written

2. Keith Fisk Pierre, SD

Cooperatively working with private landowners is necessary to be successful. Keep up the good work!

3. Gary LaFranier Lame Deer, MT

Its good that this is happening due to the fact that more cattle are being placed on natural elk gatherings. More diseases are being formed and taking out wildlife. Keeping wild life "wild" will be the best idea and utilizing more testing would help a lot.

4. Gerald Cobell, Director - Blackfeet Fish & Wildlife Dept. Browning, MT

The Blackfeet Nation would recommend that specific management actions, particularly lethal removal of elk, incorporate tribal treaty hunting opportunities for Blackfeet subsistence hunters. The Blackfeet Nation would appreciate an opportunity to meet with MFWP officials to discuss such opportunities. Thanks for the opportunity to comment and we look forward to further discussion in this regard.
